

## Newsletter 74: Some Background on Big Pharma and the Covid Pandemic

Dear Readers,

For almost two years the world has been transformed in ways not before imaginable. Under declaration of global pandemic causing a disease called covid19, the UN WHO and national health authorities such as Tony Fauci's National Institute for Allergies and Infectious Diseases (NIAID) have managed to impose controversial measures such as lockdowns, mask mandates and more recently vaccine mandates for unproven vaccines. For this issue I want to share two of my recent writings that describe the actual histories of the major vaccine makers and a second dealing with the fraudulent PCR tests. Together they suggest that our world is being transformed into an Orwellian dystopian nightmare that is based not at all on "the science" as Fauci claims.

If you have not yet, please consider a [donation](#) of support for my online voice. The relentless censorship of the Internet and social media by the private corporate companies since the 2020 Coronavirus is alarming and is getting more Orwellian by the day.

I thank you again for your interest and support,

William Engdahl

The China government statistical agency just released economic data showing the poorest GDP growth

# **Delta Variants, PCR Tests and Cognitive Dissonance**

By F. William Engdahl

9 August, 2021

**To paraphrase a famous quip from then Presidential candidate Bill Clinton in a debate with his Republican opponent in 1992, “It’s the vaccine, stupid!” The daily mainstream media and government narrative we are being inundated all over the world with is confusing to most, to put it mildly. So-called Delta or “Indian” variant is spreading like chicken pox we are told, but not what that “spreading” means. Unvaccinated are accused of spreading covid19 to those supposedly vaccinated. The USA, UK and EU are leading this confusing and deadly narrative.**

Children are told by political appointees to get the jab despite official recommendation from WHO and national medical authorities such as STIKO in Germany to wait. PCR tests that define policy, but which do not tell anything about a person’s having a specific virus, are treated as a “Gold Standard” of infection. Yet as of this writing not one lab has successfully isolated purified samples of the alleged SARS-CoV-2 virus said to cause the covid19 disease. How can PCR tests be calibrated if the claimed pathogen is not clear? If we take a step back it becomes clear that we are being subjected to a deliberate worldwide operation in cognitive dissonance whose intended consequences for the future of our civilization are not being told to us.

## **Resolving dissonance**

Cognitive dissonance is a term in psychology for a person’s experience of two contradictory or inconsistent experiences whose inconsistency causes them great stress. The stress is resolved in the brain by the person playing unconscious tricks to resolve the contradiction. The Stockholm Syndrome comes to mind. In this case it is the traditional trust in Authority— governments, WHO, CDC, RKI, Bill Gates and other self-appointed epidemiological experts, in many cases with no medical degree. These authorities are imposing draconian lockdowns, masking and travel restraints and what is rapidly becoming de facto forced vaccination with untested jabs whose adverse effects now number in the millions in the EU and USA.

The ordinary brain says, “Why would the authorities want to harm us? Don’t they want the best for us and the country or the world?” The real experiences of the past 18 months since the World Health Organization declared a pandemic over an alleged virus first proclaimed in Wuhan China suggest that either politicians and health officials across the world have lost their minds, are deliberately evil, or willfully destructive or simply corrupt. To resolve that frightening contradiction, millions of us take an experimental concoction known as mRNA genetically-edited substance assuming then they are protected against infection or severe illness from an alleged deadly pathogen called covid19. Some even attack those around them who view the dissonance differently and who refuse a vaccine out of distrust and caution. Yet even the ever-present Dr. Fauci in Washington admits the novel mRNA vaccines do not prevent getting the alleged disease or being infectious, only maybe helps lessen its impact. That is not a vaccine, but rather something else.

### **Delta Variant?**

At this point it is useful to look at several demonstrated facts around this coronavirus and its apparently unlimited “variants.” The current scare in the UK and EU as well as the USA is a so-called Delta variant of the coronavirus. The only problem is that we are not being told by the relevant authorities anything useful about that variant.

Since the alleged Delta variant of an alleged but nowhere scientifically proven Wuhan novel coronavirus is being used to justify a new round of draconian lockdowns and pressure to vaccinate, it is worth looking into the test to determine if a Delta variant is present in a tested person tested with the standard WHO-recommended PCR test.

The Delta Variant back in May was originally called the Indian variant. It was soon blamed for up to 90% of new covid19 positive tests in the UK, which also has a significant Indian population. What is not being told is that in just two months the alleged Delta positives in India dropped dramatically from 400,000 daily in May to 40,000 in July. Symptoms were said to be suspiciously like that for ordinary hay fever, so the WHO quickly renamed it the Delta variant according to the Greek alphabet just to muddy the waters more. Similar Delta

declines came in the UK. “Experts” claimed it was because terrified Indians stayed at home as only a tiny 1-3% of the population had been vaccinated. In UK experts there claimed it was because so many had been vaccinated that Delta cases plunged. <sup>i</sup> If you get the impression they are just inventing explanations to feed the vaccine narrative, you are not alone.

It gets worse. Virtually no one in the UK, India the EU or the USA who is claimed to have been tested positive for Delta has had a specific Delta variant test as such a direct variant test does not exist. Complex and very costly tests are claimed to exist, but no proof is offered that they are being used to claim such things as “90% of UK cases are Delta...” Labs around the world simply do the standard, highly inaccurate PCR tests and health authorities declare it is “Delta.” There is no simple test for Delta or any other variant. If that were not true, the CDC or WHO or other health institutes should explain in detail those tests. They haven’t. Ask relevant health “experts” how they prove presence of a Delta variant virus. They cannot. Testing labs in the USA admit that they do not test for any variants. <sup>ii</sup>

### **Worthless PCR Tests**

Even the PCR test itself is not a test for any virus or disease. The scientist who won a Nobel Prize for inventing the PCR test, Dr. Kary Mullis, went on TV to attack by name NIAID head Tony Fauci as incompetent for claiming the PCR tests could detect any pathogen or disease. It was not designed for that, but rather as a laboratory analytical tool for research. PCR tests cannot determine an acute infection, ongoing infectiousness, nor actual disease. <sup>iii</sup> The PCR test is not actually designed to identify active infectious disease, instead, it identifies genetic material, be it partial, alive, or even dead.

A January 21, 2020 published paper by two Germans, Corman and Drosten, was used to create the PCR test immediately adopted by the WHO to be the world standard to detect cases of the novel coronavirus from Wuhan. At that point a mere six persons had been identified having the novel coronavirus. In November 2020 a group of scientific external peers reviewed the Drosten paper and found an incredible number of major scientific flaws as well as brazen conflict of interest by Drosten and colleagues. The scientists noted the

Drosten PCR design and paper suffered from, “numerous technical and scientific errors, including insufficient primer design, a problematic and insufficient RT-qPCR protocol, and the absence of an accurate test validation. Neither the presented test nor the manuscript itself fulfils the requirements for an acceptable scientific publication. Further, serious conflicts of interest of the authors are not mentioned. Finally... a systematic peer review process was either not performed here, or of problematic poor quality.”<sup>iv</sup> Yet the Drosten PCR design was immediately recommended by the WHO as the world corona test.

The PCR amplifies genetic material by using cycles of amplification until it reaches what is called Cycle threshold (Ct), the number of amplifications to detect genetic material before the sample becomes worthless. Mullis once said if you amplify by enough cycles you can pretty much find anything in anybody as our bodies carry huge numbers of different viruses and bacteria, most harmless. Even Dr. Fauci in a 2020 interviews stated that a CT at 35 or above is worthless. Yet the CDC is believed to recommend testing labs to use a CT of 37 to 40! At that level perhaps 97% of covid positives are likely false.<sup>v</sup>

Neither the CDC nor the WHO makes public their Ct recommendations, but reports are that the CDC now recommends a lower Ct threshold for testing vaccinated so as to minimize covid positives in the vaccinated, while recommending a Ct above 35 for the unvaccinated, a criminal manipulation if it is true.<sup>vi</sup>

For those interested in the evolution of perverting the PCR tests to supposedly diagnose specific presence of a disease, look into the sordid history beginning in the 1980s of Fauci and his underling then, Dr Robert Gallo, at NIAID, using Mullis' PCR technology to wrongly claim a person is HIV-positive, a criminal enterprise that resulted in unnecessary deaths of tens or hundreds of thousands of people.<sup>vii</sup>

Notably nearly every prominent covid vaccine advocate from Fauci to WHO head Tedros have come out of the HIV/AIDS swamp and its fake PCR testing. The entire panic measures imposed since 2020 around the world are based on the false premise that “Positive” RT-PCR test means being sick or infected with COVID. The COVID-19 scare that emanated from Wuhan, China in December of 2019 is a pandemic of testing as many doctors have pointed out. There is no

proof that a pathogenic virus is being detected by the test. Nor is there a proven reference value, or “gold standard” to determine positive. It is purely arbitrary. Do the research and you will find it.

### **Pushing Experimental Vaccines**

If it is the case that we have destroyed trillions of dollars in the world economy since early 2020 and ruined countless lives based on worthless PCR tests and now the same fraud extends the insanity for an alleged Delta variant, the clear conclusion is that some very influential actors are using that fear to drive experimental genetic vaccines never before tested on humans nor extensively on animals.

Yet the vaccine-related official death toll in the EU and USA continue to break records. As of this writing, according to the official EU database for recording vaccine injuries, EuraVigilance, by August 2 a total of 20,595 deaths had been reported of people who previously received the experimental genetic mRNA jabs! Such numbers have never before been seen. In addition there have been reported 1,960,607 injuries and 50% of them serious including blood clots, heart attacks, menstrual irregularities, paralysis, all following COVID-19 mRNA injections.<sup>viii</sup> The USA data at the CDC VAERS database is being manipulated openly, but even they show more than 11,000 post-mRNA vaccine deaths. The major news media never mention this.

Authorities and politicians reply that there is no evidence the deaths or injuries were vaccine related. But they cannot prove that they were not because they prohibit doctors from doing any autopsy. If we are told to follow science, why are doctors being told by health officials to not do autopsies on patients who died AFTER receiving two mRNA vaccines? After thousands of vaccine-related deaths only one autopsy has been reported, that in Germany, and the findings were horrific. The mRNA spike protein had spread through the entire body.<sup>ix</sup> The CDC stopped monitoring non-severe COVID-19 cases among vaccinated people in May. That hides the alarming number of vaccinated who get seriously ill.

Something is terribly wrong when respected experienced medical experts are being banned for suggesting alternative hypotheses to the entire covid drama.

When other scientists adhering to the official line call for any criticism of Tony Fauci or other mainstream covid doctors, they are to be labelled as doing a “Hate Crime.” Or when cheap and proven remedials are prohibited in favor of the costly deadly mRNA vaccines in which Fauci’s NIAID holds a financial interest.

Already vaccine advocates such as Fauci are speaking of the need for booster mRNA shots and warning of yet a new “Lambda variant” looming. How will they test for that? Or are we to take it on faith because he or she is said by CNN or BBC to be a “respected authority”? How far will sane citizens allow this cognitive dissonance to destroy our lives?

## **We Should Trust ‘The Science’ of the Pharma Industry?**

By F. William Engdahl

27 July, 2021

**The forever-head of the US NIAID, Tony Fauci, has repeatedly demanded that the public “trust the science” as he shifts his own science opinion from one position to another. What is never mentioned in mainstream media in the West or almost anywhere in the world is the scientific record of the major global vaccine making pharmaceutical giants. In short, it is abysmal and alarming in the extreme. That alone should prohibit governments from pushing radical untested experimental injections on their populations without extensive long-term animal and other testing to assure their safety.**

This past April as the US vaccination program was in high gear, the Biden chief covid adviser, 80-year-old Fauci, head of the National Institute of Allergy and Infectious Disease (NIAID) since 1984, announced that the US Centers for Disease Control (CDC) and the Food and Drug Administration (FDA) had decided to order a “pause” on giving the Johnson & Johnson (Janssen) vaccine in order to examine reports of blood clots. It turned out that there were six reported blood clot cases of some seven million who then had had the J&J covid jab. Fauci in his press remarks declared, “one of the things that’s, I think, such a good thing about our system here, is that we’re ruled by the science, not by any other consideration.”<sup>x</sup> There is good reason to question Fauci.

That was supposed to reassure people that the authorities were being ultra-careful with the experimental covid medications which, after all, never have been mass-tested on humans before and have only gotten “emergency use authorization,” provisional FDA approval. The FDA quickly lifted the pause as J&J agreed to print that its vaccine could cause blood clots.

Yet at the same time, rival vaccine makers, Pfizer and Moderna, both using a hyper-experimental genetic treatment known as mRNA, were not being paused by “the science” despite the fact that hundreds of thousands of alarming vaccine-related severe reactions, including official data of several thousand deaths from both, had been recorded by CDC data base, VAERS (Vaccine Adverse Event Reporting System).

According to the CDC such “adverse” events, post-vaccine, include anaphylaxis, thrombosis with thrombocytopenia syndrome, Guillain-Barre Syndrome, myocarditis, pericarditis, and death. For the week of July 16 the CDC VAERS reported an alarming 9,125 reported deaths since late December from the COVID-19 vaccinations. Never in history have such high death totals been associated with any vaccine, yet the media is deafeningly silent about this. <sup>xi</sup>

### **Their dismal science record**

The wording of Fauci is precise and deliberately manipulative. It suggests that there exists some fixed thing we can call “The Science,” like some Vatican religious dogma, whereas the real scientific method is one of continuous questioning, overturning past hypotheses with newly proven ones, adjusting. Yet when it comes to “Science,” the handful of giant vaccine makers, sometimes known as Big Pharma, a cartel not unlike Big Oil, have a record of fraud, deliberate doctoring of their own tests, as well as widespread bribing of doctors and medical officials to promote their various drugs despite “Science” results that contradict their assertions of safety. A look at the major global pharmaceutical giants is instructive.

### **J&J**

We begin with the Johnson & Johnson Company of New Jersey. On July 21, 2021 J&J and three other smaller drug makers agreed to pay a staggering \$26 billion damages to a group of US states for their role in causing America’s opioid epidemic. Of that J&J will pay \$5 billion. The CDC estimates that use of the highly-addictive opioids as painkillers caused at least 500,000 deaths between 1999 and 2019. Johnson & Johnson is accused of pushing the deadly painkillers for excessive use and downplaying their addiction risks. They knew better.<sup>xii</sup>

The same J&J is in a huge legal battle for knowingly using a carcinogen in its famous baby powder. A 2018 Reuters investigation found J&J knew for decades that asbestos, a known carcinogen, lurked in its baby powder and other cosmetic talc products. The company is reportedly considering legally splitting

its baby powder division into a small separate company that would then declare bankruptcy to avoid large payouts.<sup>xiii</sup> The J&J covid vaccine, unlike that from Pfizer and Moderna, does not use mRNA genetic alteration.

The two global covid vaccine makers which have by far the largest market to date are the two being personally promoted by Fauci. These are from Pfizer in alliance with the tiny German BioNTech company under the name Comirnaty, and from the US biotech Moderna.

## **Pfizer**

Pfizer, one of the world's largest vaccine makers by sales, was founded in 1849 in the USA. It also has one of the most criminal records of fraud, corruption, falsification and proven damage. A 2010 Canadian study noted, "Pfizer has been a "habitual offender," persistently engaging in illegal and corrupt marketing practices, bribing physicians and suppressing adverse trial results."<sup>xiv</sup> That's serious. Note that Pfizer has yet to make fully public details of its covid vaccine studies for external examination.

The list of Pfizer crimes has gotten longer since 2010. It is currently engaged in lawsuits related to charges its Zantac heartburn medication is contaminated with a cancer-causing substance. As well, Pfizer received the biggest drug-related fine in US history in 2009 as part of a \$2.3 Billion plea deal for mis-promoting medicines Bextra and Celebrex and paying kickbacks to compliant doctors. Pfizer pleaded guilty to the felony of marketing four drugs including Bextra "with the intent to defraud or mislead." They were forced to withdraw their arthritis painkiller Bextra in the USA and EU for causing heart attacks, strokes, and serious skin disease.<sup>xv</sup>

Clearly in a move to boost revenue, Pfizer illegally paid doctors kickbacks for "off-label" use of more than one of its drug which resulted in patients being injured or killed. Among them were Bextra (valdecoxib); Geodon (ziprasidone HCl), an atypical antipsychotic; Zyvox (linezolid), an antibiotic; Lyrica (pregabalin), a seizure medication; its famous Viagra (sildenafil), an erectile dysfunction drug; and Lipitor (atorvastatin), a cholesterol drug.<sup>xvi</sup>

In another court trial, Pfizer subsidiaries were forced to pay \$142 million and release company documents that showed it was illegally marketing gabapentin for off-label use. “Data revealed in a string of U.S. lawsuits indicates the drug was promoted by the drug company as a treatment for pain, migraines and bipolar disorder – even though it wasn’t effective in treating these conditions and was actually toxic in certain cases, according to the Therapeutics Initiative, an independent drug research group at the University of British Columbia. The trials forced the company to release all of its studies on the drug, including the ones it kept hidden.”<sup>xvii</sup>

In 2004 Pfizer subsidiary Warner-Lambert was forced to pay \$430 to settle criminal charges and civil liability arising from its fraudulent marketing practices with respect to Neurontin, its brand for the drug gabapentin. Originally developed for the treatment of epilepsy, Neurontin was illegally promoted off-label for the treatment of neurological pain, and in particular for migraine and bipolar disorder – even though it wasn't effective in treating these conditions and was actually toxic in some cases. Neurontin for unapproved uses made up some 90% of the \$2.7 billion in sales in 2003.<sup>xviii</sup>

A New York Times report disclosed in 2010 that Pfizer “...paid about \$20 million to 4,500 doctors and other medical professionals in the United States for consulting and speaking on its behalf in the last six months of 2009.” It paid another \$15.3 million to 250 academic medical centers and other research groups for clinical trials. In the US legal practice it is seldom that corporate executives actually doing the criminal deeds are prosecuted. The result is that court fines can be treated as “business costs” in this cynical milieu. In eight years of repeated malfeasance through 2009, Pfizer accumulated just under \$3 billion in fines and civil penalties, about a third of one year’s net revenues.<sup>xix</sup>

In 2020 as its covid vaccine was in development, Pfizer paid \$13,150,000 in lobbying Congress and officials in Washington among others. Also notable is the fact that the Bill and Melinda Gates Foundation own shares of both Pfizer and their partner in the leading mRNA vaccine, BioNTech of Germany.<sup>xx</sup>

## Moderna

The third covid vaccine producer today with FDA Emergency Use Authorization (EUA) is Moderna of Cambridge, Massachusetts. It has yet to be sued for illegal practices unlike J&J or Pfizer. But that fact is likely only because before its EUA for its mRNA experimental vaccine, in its ten years existence since 2010 it had failed to get FDA approval to market a single medicine, despite repeated failed attempts. However Moderna has a red neon sign that reads “conflict of interest” that should give pause.

Moderna and Fauci’s NIAID have collaborated on development of vaccines using Moderna’s mRNA platform and NIAID of Fauci on coronaviruses including MERS, since at least November, 2015. On January 13, 2020, before the first case of a supposed Wuhan, China “novel coronavirus” was even detected in the United States, Fauci’s NIAID and Moderna signed an updated cooperation agreement which described them as co-owners of a mRNA based coronavirus and that they had finalized a sequence for mRNA-1273, the vaccine now being given to millions for supposedly averting the novel coronavirus.<sup>xxi</sup> That means that Fauci’s NIAID and perhaps Fauci personally (it’s allowed in the US) stood to reap huge financial benefits from emergency approval of the Moderna jab, yet Fauci has never admitted to the conflict publicly when he was Trump corona adviser, nor as Biden’s.

Ten days later on January 23, 2020 Moderna announced it was granted funding by CEPI, a vaccine fund created by Bill Gates’ foundation along with Davos WEF among others, to develop an mRNA vaccine for the Wuhan virus.<sup>xxii</sup>

Moderna was created by a venture capitalist, Noubar Afeyan along with Harvard professor Timothy A. Springer, and others. In 2011 Afeyan recruited French businessman and former Eli Lilly executive Stephane Bancel as CEO of the new Moderna. Despite having no medical or science degree nor any experience running a drug development operation, Bancel lists himself as co-patent holder for a hundred patents of Moderna tied to the different vaccines. Beginning in 2013 the tiny Moderna was receiving grants from the Pentagon to develop its mRNA technology. As of 2020 just prior to its receiving emergency use authorization from the US Government FDA, fully 89% of Moderna revenues were from US Government grants. This is hardly an experienced

company yet it holds the fate of millions in its hands. As Fauci says, “Trust the Science.”

In February 2016, an editorial in Nature magazine criticized Moderna for not publishing any peer-reviewed papers on its technology, unlike most other emerging and established biotech companies. The company remains ultra-secretive. That same year, 2016 Moderna got \$20 million from the Gates Foundation for vaccine development using mRNA.<sup>xxiii</sup>

Up to its receiving EUA approval for its covid mRNA product in December 2020 Moderna had only made losses since its founding. Then curiously, following a March 2020 personal meeting with then-President Trump where Bancel told the president Moderna could have a vaccine ready in a matter of months Moderna luck changed.

On May 15, Trump announced creation of Operation Warp Seed to rollout a covid19 vaccine by December. The head of the Presidential group was a 30-year R&D veteran of the large UK drug firm GSK, Moncef Slaoui. In 2017 Slaoui had resigned from GSK and joined the board of none other than Moderna. Under Slaoui’s Warp Speed, some \$22 billion of US taxpayer money was thrown at different vaccine makers. Moderna was a prime recipient, a brazen conflict of interest but nobody seemed to care. Slaoui funneled some \$2 billion in government funds to his old company, Moderna, to develop the mRNA covid vaccine. Only under public criticism did Slaoui sell his stock in Moderna, making millions in profit from Moderna’s role as a covid vaccine leading candidate. Shortly after resigning at the end of the Trump presidency, Slaoui was fired by his old firm GSK from a company subsidiary following charges of sexual harassment of a female employee.<sup>xxiv</sup>

In February 2020 Trump Secretary of Health and Human Services, Alex Azar, invoked the Public Readiness and Emergency Preparedness Act (PREP) to exempt Moderna, Pfizer, J&J and any future covid makers from any and all liability arising from damage or death caused by their vaccines for the Wuhan coronavirus. The legal protection lasts until 2024. If the vaccines are so good and safe, why is such a measure needed? Azar was former head of the US drug giant Eli Lilly.<sup>xxv</sup> There are some serious questions that must be raised openly regarding the vaccine makers who are now pushing experimental highly controversial gene-edited formulations in human experiments.
